

Boost Feature – Astrologer Flow, Rules & Edge Cases

Boost Kya Hai?

Boost ek Astrologer-side visibility feature hai.

Astrologer Boost activate karta hai taaki uski profile ki visibility platform par temporarily increase ho aur usse additional consultations/sessions mil sakein.

Boost ke बदले platform ko benefit is form mein milega ki **Boost-attributed sessions par astrologer ka revenue share/payout lower hoga.**

Example

Normal session:

User ₹1,000 pay karta hai → Astrologer ko normal applicable share milta hai.

Boost session:

User ₹1,000 hi pay karta hai → User ke payment mein koi change nahi hota → Boost ke according astrologer ko reduced share milta hai.

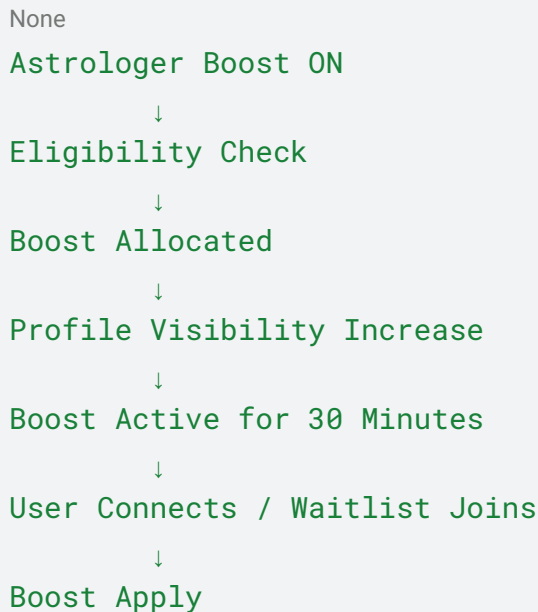

For example:

User Payment = ₹1,000
Astrologer Share = 30%
Astrologer Payout = ₹300
Platform Share = ₹700

Boost Kya Nahi Hai?

- Boost **user-facing feature nahi hai.**
- User ko Boost ke baare mein kuch show nahi karna hai.
- User ke consultation price/payment par Boost ka koi impact nahi hoga.
- User ko koi Boost eligibility नहीं मिलेगी.
- Boost user ke account/profile se related nahi hai.
- Boost ka purpose sirf **Astrologer's profile visibility increase karna aur uske against applicable payout/share calculate karna hai.**

1. Basic Boost Flow

Boost ke 2 main criteria:

1. 30 minutes complete hona
2. Boost ke under jo active session hai, uska complete hona

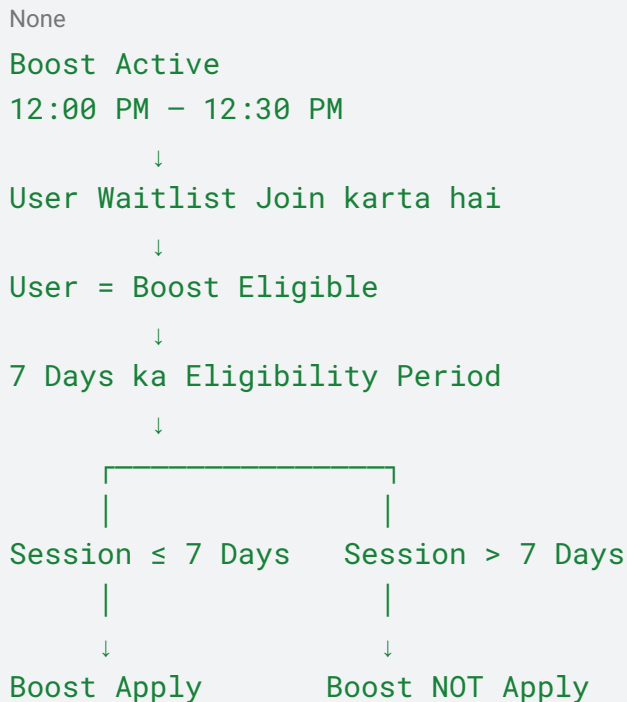

Dono conditions ko system ko separately track karna hai.

2. Important Edge Cases

Edge Case	Kya hoga?
EC-1: Normal Session	Boost active hai → User connect karta hai → Session complete hota hai → Session par Boost apply hoga.
EC-2: Session 30 min se pehle end	Example: 30 min Boost mein user ne 28 min baat ki. 2 min ka Boost window remaining hai. Next eligible session par Boost continue ho sakta hai.
EC-3: Session 30 min ke baad bhi chalta rahe	Example: Boost 12:00–12:30 hai, lekin user ka session 12:28 par start hua aur 1 hour chala. Poore session par Boost apply rahega , kyunki session Boost ke under start hua tha.
EC-4: Boost ke time Waitlist Join	User ne Boost active hone ke time waitlist join ki → us user ka future session Boost eligible hoga, chahe actual session baad mein start ho.

EC-5: Boost End hone ke baad Waitlist Join	Boost khatam hone ke baad waitlist join ki → us user par Boost apply nahi hoga.
EC-6: Waitlist User 7 din ke andar connect	Boost active period mein waitlist join ki aur 7 days ke andar session le liya → Boost apply hoga.
EC-7: Waitlist User 7 din ke baad connect	Boost active period mein waitlist join ki, but 7 days tak session nahi liya → Boost eligibility expire ho jayegi. Baad mein session lene par Boost apply nahi hoga.

3. Waitlist Boost – Simple Flow

Example

Boost active:

12:00 PM – 12:30 PM

User A waitlist join karta hai:

12:20 PM

Ab User A Boost eligible hai.

- User A **20 August** ko session leta hai →  Boost Apply
- User A **25 August** ko session leta hai →  Boost Apply
- User A **28 August** ko session leta hai →  Boost Apply nahi hoga

Rule: Waitlist join hone ke maximum 7 days tak hi Boost eligibility valid rahegi.

4. Boost ID

Har Boost ko ek **unique Boost ID** milegi.

Example:

Boost ID: B001245

Boost details:

Boost ID: B001245

Date: 19 Aug 2026

Active: 12:00 PM – 12:30 PM

Ye same Boost ID astrologer ko multiple places par dikhegi.

Boost History

None

Boost History

B001245

19 Aug 2026

12:00 PM – 12:30 PM

Status: Completed

My Sessions

Agar kisi session par Boost apply hua hai:

None

Session Details

User: XXXXX

Duration: 28 min

Boost ID: B001245

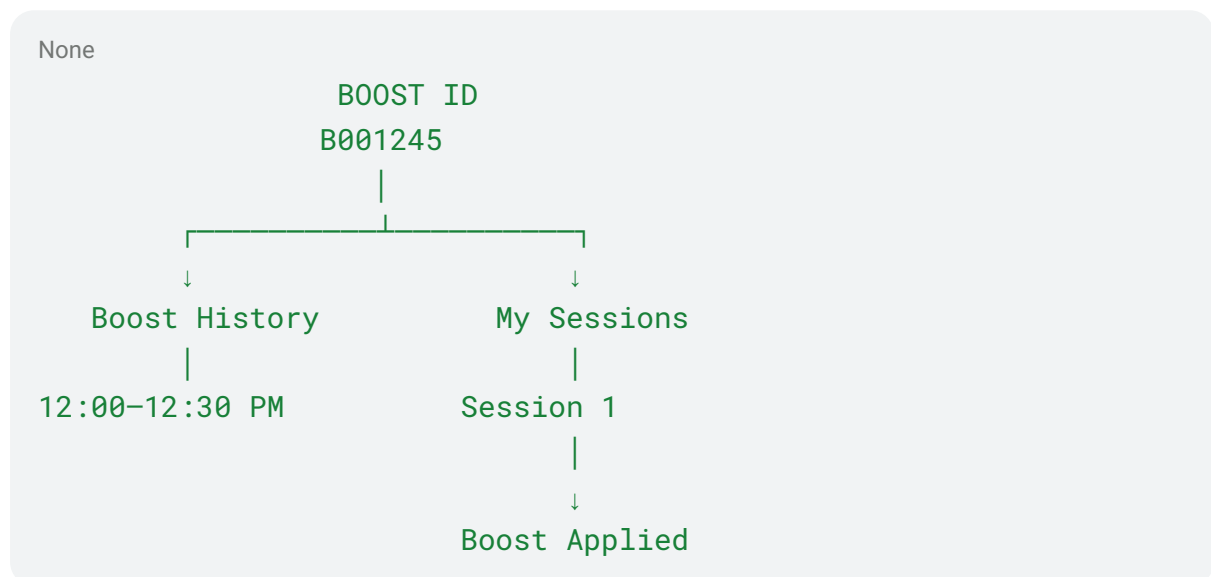

Boost Applied: Yes
Share: XX%

Isse astrologer ko clearly samajh aayega:

"Is session par mera Boost apply hua tha, isliye meri applicable earning/share alag hai."

5. Boost ID Mapping

Same Boost ID ko complete journey mein maintain karna hai:

Agar ek hi Boost ke through multiple users eligible hue hain, to un **sabhi sessions mein same Boost ID** show hogi.

6. Most Important Rule

Boost ka 30-minute timer aur session duration alag cheezein hain.

Example:

None

Boost: 12:00 ————— 12:30

Boost ends

Session: 12:28 ————— 1:28

Session ends

Session **12:28 PM par Boost ke under start hua**, isliye poore session par Boost applicable rahega—even though original 30-minute Boost window 12:30 PM par khatam ho gayi thi.

7. Final Logic

None

BOOST ACTIVE

30 MINUTE WINDOW

User Connect

Waitlist Join

Nothing

Boost Apply

7-Day Eligibility

Connect ≤7D

Connect >7D

BOOST APPLY

NO BOOST

Core principle:

Boost jis user/session ko eligibility deta hai, uska Boost status **Boost ID ke saath track hoga**, taaki astrologer ko clearly dikhe ki kis session par Boost apply hua aur uski earning/share calculation kyun different hui.

HSH

HSH-01: Multiple users join waitlist

Expected: Same active Boost ID ke under sabhi relevant waitlist entries associate hogi.

HSH-02: Waitlist → Cancel → Rejoin

Expected: Waitlist se completely remove hone par previous attribution end ho jayegi. Baad mein rejoin karne par **us time active Boost** ke according new attribution create hogi.

HSH-03: Astrologer unavailable

Expected: Existing valid attribution automatically remove nahi hogi. Applicable session hone par relevant Boost ID use hogi.

HSH-04: User cancels session

Expected: User waitlist mein retain rahega aur valid attribution retain hogi.

HSH-05: Astrologer cancels session

Expected: User waitlist mein retain rahega aur valid attribution retain hogi.

HSH-06: User waitlist se completely remove

Expected: Previous attribution terminate hogi.

HSH-07: User later reconnects

Expected: Agar existing attribution valid hai → same Boost ID. Agar fresh waitlist join hai → us waqt active Boost ID.

HSH-08: Multiple sessions

Expected: Har applicable session par Boost attribution aur reduced share apply hoga.

HSH-09: Boost expire hone ke baad session continue

Expected: Agar session Boost ke under start/attribute hua tha, to Boost attribution continue rahegi; sirf 30-minute visibility window expire hogi.

HSH-10: New Boost starts

Expected: New Boost ko new Boost ID milegi. Existing attribution automatically new Boost mein transfer nahi hogi.

HSH-11: Back-to-back Boost

Expected: Har session ko **sirf ek Boost ID** attribute hogi. Overlapping attribution nahi hogi.

HSH-12: User payment

Expected: Boost ki wajah se user ka consultation price/payment change nahi hoga.

HSH-13: Boost payout

Expected: Boost-attributed session par predefined reduced astrologer share apply hoga.

HSH-14: Boost History

Expected: Har Boost ka unique Boost ID, start/end time, status aur attributed sessions history mein visible honge.

HSH-15: Session History

Expected: Boost-attributed session mein Boost ID aur applicable astrologer share visible hona chahiye.
